EXPERIENCE

AI Application Developer — CT Realty Trust *Aug 2025 – Present*

White Oaks at Wilton · property management platform · whiteoakswilton.com

Designed and shipped a full property management platform for a real estate client: a public leasing site and an operator analytics console on a FastAPI and Supabase backend. Built a first-party analytics pipeline from scratch, and integrated the Rent Manager API and Claude AI so live pricing, automated prospects, and lead handling all run on their own.

Independent Futures Trader *Dec 2024 – Present*

Trade index futures independently with a focus on discipline, risk management, and data-driven decision making, treating every trade as a process to manage rather than a bet to win.

Shift Leader — Five Guys Enterprise *Oct 2018 – Nov 2022*

Led shift operations and supervised team members in a fast-paced service environment, coordinating staff and keeping quality and safety standards on track.

PROJECTS

White Oaks at Wilton — Next.js · FastAPI · Supabase *Live 2026*

Property management platform · whiteoakswilton.com

A live leasing site and private analytics console. A self-contained analytics pipeline tracks visitors, lead sources, and live metrics with no third-party warehouse, wired into Rent Manager and Resend for automated prospects and lead alerts.

MacroVault — React · Supabase · Python *Sept 2025*

Full-stack fitness SaaS

A full-stack fitness app with free and paid tiers gated through Stripe, plus an AI meal-suggestion feature on the Claude API that recommends meals against remaining daily macros. Currently building the native iOS version.

PulseLock — Swift · SwiftUI · HealthKit *May 2026*

Native iOS & watchOS app

A native App Store app that locks distracting apps until an Apple Watch verifies a real workout, built on DeviceActivity, HealthKit, and HKWorkoutSession. Handles background heart-rate tracking and RevenueCat subscriptions end to end.

SKILLS

AI & Concepts Claude API, Prompt Engineering, AI-Assisted Development, Data Analytics, Attribution Modeling, SaaS Architecture

Tools Git, GitHub, Vite, Cursor, Claude Code

Data & Infra SQL, Supabase (Postgres), Vercel, Render, Stripe, RevenueCat, DNS / SPF, DKIM

Frontend React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind, Framer Motion

Backend Python, FastAPI, C++, REST APIs

EDUCATION

California State University, Fullerton

B.S., Computer Science

December 2025

SIM RACING

Competing since 2012 · $120K+ career earnings

2× Champion eNASCAR College iRacing Series

3× Race Winner eNASCAR Coca-Cola iRacing Series

Teams

Kligerman Burton Esports, William Byron Esports, eRacr

Sponsors

Valvoline, Logitech G

Ran live sim training for pro NASCAR drivers on FOX broadcasts.
